

Gloves for troops;

I requested to be able to put a note in to the package with the camera so I could thank you for this wonderful gift. I'm not going to lie being away from home sucks, but someone has got to do it you know. These gloves reminded me so much of when I was growing up. I'm a left fielder but sometimes played short stop. Or as I like to call that position "target." Cause thats where most of those really hard eye level hits go. I hope you like the pictures, sorry that we were not able to take more. Trying ~~to find~~ <sup>to find</sup> someone to take play catch left alone take pictures is hard because we have alot of missions going on. I have to tell you though the chances that I've been able to play since I got this glove. Takes me back everytime to those cool spring days in left field catching those fly balls. And just those simple times of playing catch with my Dad. I never realized how ~~the~~ special those memories are, now that they were so long ago. Its hard to enjoy those memories being in such a different place. Afganhistan is nothing like I imagined. Thank you for giving us a small piece of home.

Thank you
